The Journal of Laboratory and Clinical Medicine

EDITOR
WILLIAM D. ROBINSON, M.D.

ASSOCIATE EDITOR
WILLIAM H. BEIERWALTES, M.D.

University Hospital
University of Michigan Medical School
1405 East Ann Street, Ann Arbor, Michigan

BOARD OF EDITORS

WILLIAM H. DAUGHADAY, M.D.
Washington University, St. Louis

ROBERT H. FURMAN, M.D.
University of Oklahoma, Oklahoma City

ROBERT A. GOOD, M.D.
University of Minnesota, Minneapolis

HARPER K. HELLEMS, M.D.
Seton Hall College, Jersey City

ROBERT M. KARK, M.D.
University of Illinois, Chicago

RICHARD L. LANDAU, M.D.
University of Illinois, Chicago

GORDON MEIKLEJOHN, M.D.
University of Colorado, Denver

OSCAR D. RATNOFF, M.D.
University Hospitals, Cleveland

ROBERT F. SCHILLING, M.D.
University of Wisconsin, Madison

DONALD W. SELDIN, M.D.
University of Texas, Dallas

WILLIAM A. SODEMAN, M.D.
Jefferson Medical College, Philadelphia

GENE H. STOLLERMAN, M.D.
Northwestern University, Chicago

INDEX TO VOLUME 56

AUTHOR INDEX*†

ABBOTT, WILLIAM E. (*See* VIGNOS, ABBOTT, POST, AND LEVEY), 954 (Abst.)

ABBOUD, F. M., AND ECKSTEIN, JOHN W. Effect of guanethidine on forearm vascular responses to graded doses of norepinephrine, 786 (Abst.)

ADICOFF, ARNOLD (*See* ALEXANDER, DAVIS, AND ADICOFF), 787 (Abst.)

AFONSO, SKODA (*See* MAXWELL, CASTILLO, CRUMPTON, AFONSO, CLIFFORD, AND ROWE), 38

—. (*See* ROWE, CHELIUS, AFONSO, GURTNER, AND CRUMPTON), 943 (Abst.)

—. (*See* ROWE, MAXWELL, CASTILLO, AFONSO, GURTNER, CHELIUS, AND CRUMPTON), 874

ALBERT, CHALOM A. (*See* ALBERT, ALBERT, AND FAZEKAS), 473

ALBERT, SOLOMON N., ALBERT, CHALOM A., AND FAZEKAS, JOSEPH F. A rapid and simple method for measuring the rate of cerebral blood flow in humans with krypton^{85}, 473

ALBRIGHT, EDWIN C. (*See* LARSON AND ALBRIGHT), 919 (Abst.)

ALEXANDER, CARL S., DAVIS, RICHARD B., AND ADICOFF, ARNOLD. Cardiac catheterization findings including simultaneous arteriovenous serotonin concentration in malignant carcinoid syndrome, 787 (Abst.)

ALEXANDER, JAMES K., AMAD, KAMEL H., AND COLE, V. WILLIAM. Some further studies on the cardiopulmonary effects of extreme obesity, 787 (Abst.)

ALKJAERSIG, NORMA (*See* FLETCHER, ALKJAERSIG, LATALLO, AND SHERRY), 813 (Abst.)

ALT, H. L. (*See* RAMBACH, COOPER, AND ALT), 938 (Abst.)

AMAD, KAMEL H. (*See* ALEXANDER, AMAD, AND COLE), 787 (Abst.)

AMATUZIO, DONALD S., GRANDE, FRANCISCO, WADA, SHOHACHI, AND HAY, LYLE J. A natural occurring lipid that neutralizes heparin activity in blood, 277

AMBROSE, ISABELLE (*See* HORWITZ, GOLDBERG, AND SJOERDSMA), 747

ANASTASI, ADA (*See* BLOCH, PRASAD, ANASTASI, AND BRIGGS), 212

ANDERSON, GEORGE R. (*See* SASLAW AND ANDERSON), 943 (Abst.)

ANDRESEN, R. H. (*See* MONROE, MADDEN, SWARTZBAUGH, AND ANDRESEN), 930 (Abst.)

ANGARA, VIOLETTA (*See* OLINER, JACOBSON, ANGARA, AND KUNSTADTER), 933 (Abst.)

ARAI, Y. (*See* ELRICK, HLAD, ARAI, AND COEN), 807 (Abst.)

ARAKELIAN, LILLIAN (*See* SMITH, MELLINGER, ARAKELIAN, AND MANSOUR), 946 (Abst.)

ARENDS, ROBERT L. (*See* KERRIGAN, ARENDS, PANDAZI, AND HELD), 830 (Abst.)

ATAMER, M. A., AND DIETZ, ALBERT A. Alpha$_2$-type multiple myeloma, 44

AUGUST, ANNE (*See* PIROFSKY, AUGUST, NELSON, AND PITTENGER), 911

B

BAERTL, JUAN M. (*See* HALL, BAERTL, AND GABUZDA), 822 (Abst.)

BAHN, ROBERT C. (*See* EIGLER, SALASSA, BAHN, AND OWEN), 807 (Abst.)

BAKER, SAUL P., MARKOWITZ, A. S., SZANTO, PAUL B., AND DUBIN, ALVIN. Immunologic studies in atherosclerosis. III. Effect of active immunization with polyvalent human beta lipoprotein antigens on serum lipids, proteins, and atherosclerosis in cholesterol-fed rabbits, 788 (Abst.)

BALTCH, ALDONA L., OSBORNE, WINIFRED, BUNN, PAUL A., CANARILE, LEONARD, AND HASSIRDJIAN, ANN. Serum complement and bacteriophage neutralization titers in human infections, leukemias, and lymphomas, 594

BARBER, NORMAN H. (*See* GILBERT AND SCHILLER), 818 (Abst.)

BARLOW, JAMES L. (*See* LEVY, BLATTBERG, AND BARLOW), 105

*In the index, after the author's name, the title of the subject is given as it appeared in the journal. Abstracts of articles read before the Central Society for Clinical Research are marked (Abst.).

†July, pp. 1-166; August, pp. 167-332; September, pp. 333-498; October, pp. 499-664, November, pp. 665-830; December, pp. 831-998.

BARNES, ARTHUR E. Failure of $Rh_o(D)$ genotype to influence quantity of erythrocyte $Rh_o(D)$ antigen, 789 (Abst.)

BARTFELD, HARRY. Immunologic and biologic similarities of seropositive rheumatoid and nonrheumatoid disease sera: gel diffusion studies, 303

BASHOUR, F. A., AND GRAVES, GHENT. Pulmonary venoarterial admixture in cirrhosis of liver: possible site of pulmonary shunting, 790 (Abst.)

BAXTER, DONALD (*See* SMITH, GINN, BAXTER, LINDER, AND GILES), 947 (Abst.)

BECKER, ELMER L. Inactivation of Hageman factor by diisopropylfluorophosphate (DFP), 136

BECKER, GERALD (*See* HSIA, SLACK, MAHLER, TRAISMAN, AND BECKER), 828 (Abst.)

BEIERWALTES, WILLIAM H., BOLLET, ALFRED J., MATOVINOVIC, JOSIP, AND CLURE, HAROLD R. Extraocular muscle, skeletal muscle, and thyroid gland mucopolysaccharide response to thyroid stimulating hormone, 790 (Abst.)

BELSKY, JOSEPH L. (*See* PAPPER, BELSKY, BLEIFER, SAXON, AND SMITH), 727

BENDER, FRANZ, KITCHIN, ARTHUR H., AND DONALD, DAVID E. Effect of variation in time delay between atrial and ventricular contraction on cardiac output in dogs with chronic A-V dissociation using electronic bypass for A-V bundle, 791 (Abst.)

BENDER, SHELDON (*See* LISAN, OAKS, AND BENDER), 924 (Abst.)

BENNETT, I. L., JR. (*See* GROSSBERG, PETERSDORF, CURTIN, AND BENNETT), 821 (Abst.)

BENTLEY, HERSCHEL P., JR., AND KRIVIT, WILLIAM. An assay of antihemophilic globulin activity in the carrier female, 613

BENTZ, JEAN (*See* STRUMIA, COLWELL, AND STRUMIA), 576, 587

BERGENSTAL, D. M. (*See* LIPSETT, ENGEL, AND BERGENSTAL), 342

BERGLUND, E. (*See* RODBARD, WILLIAMS, AND BERGLUND), 941 (Abst.)

BERMAN, ANN (*See* SHEEHY AND BERMAN), 72

BERNSTEIN, LIONEL M., AND GROSSMAN, AARON. Osmotic diuretic treatment of "refractory" nephrotic syndrome, 792 (Abst.)

BERTON, WILLIAM M. (*See* DULANEY, CALWELL, HANCOCK, AND BERTON), 777

BIKERMAN, VALENTINE (*See* BLOCK AND BURROWS), 463

—. (*See* BLOCK, HINE, AND BURROWS), 110

BING, R. J. (*See* ROTHLIN AND BING), 942 (Abst.)

BIRNBAUM, D. (*See* RAUBITSCHEK, BIRNBAUM, AND RAKOVER), 133

BLAHD, WILLIAM H. (*See* NORDYKE, TUBIS, AND BLAHD), 438

BLANKENHORN, DAVID H., AND KUZMA, OLIVER T. Sterols in blood of patients treated with MER/29, 793 (Abst.)

BLATTBERG, BENJAMIN. (*See* LEVY, BLATTBERG, AND BARLOW), 105

BLEIFER, KENNETH H. (*See* PAPPER, BELSKY, BLEIFER, SAXON, AND SMITH), 727

BLEILER, ROBERTA, AND SCHEDL, HAROLD P. Effect of diet on creatinine excretion, 793 (Abst.)

BLOCH, HENRY S., PRASAD, ANANDA, ANASTASI, ADA, AND BRIGGS, DAVID R. Serum protein changes in Waldenström's macroglobulinemia during administration of a low molecular weight thiol (penicillamine), 212

BLOCK, JEROME B., AND BURROWS, BELTON A. Influence of serum protein binding on renal clearance of I^{131}-labeled Diodrast, 463

—, HINE, GERALD J., AND BURROWS, BELTON A. Effects of carrier Diodrast on excretion of I^{131}-labeled Diodrast, 110

BLOCK, WALTER D. (*See* JACKSON, BLOCK, AND RATLIFF), 544

BOLLET, ALFRED J. (*See* BEIERWALTES, BOLLET, MATOVINOVIC, AND CLURE), 790 (Abst.)

BOLLMAN, JESSE L. (*See* MCGILL, HOFFMAN, AND BOLLMAN), 925 (Abst.)

—, FLOCK, EUNICE V., ROTH, GRACE M., AND KVALE, WALTER F. Catecholamines in patients with pheochromocytoma, 506

BONDURANT, STUART (*See* MILLER, BONDURANT, BRATTON, AND MCILROY), 929 (Abst.)

BOONSTRA, CHARLES E., AND JACKSON, CHARLES E. Clinical value of routine serum calcium analysis, 794 (Abst.)

BRANDABUR, J. (*See* WASSERBURGER AND BRANDABUR), 956 (Abst.)

BRANDFONBRENER, MARTIN, GORDON, PAUL, AND DOWBEN, ROBERT. Effect of inosine on myocardial metabolism, 794 (Abst.)

BRANDT, RALPH L. (*See* WILSON, MORRIS, BRANDT, AND JENKINS), 207

BRATTON, JACK (*See* MILLER, BONDURANT, BRATTON, AND MCILROY), 929 (Abst.)

BRAUN, HILDEGARD (*See* MCKEEVER, BRAUN, KOSMIN, CROFT, AND CODER), 926 (Abst.)

BREGMAN, E., AND KIRSNER, JOSEPH B. Colon antibodies in ulcerative colitis, 795 (Abst.)

BRESSLER, RUBIN, FORSYTH, BEN R., AND KLATSKIN, GERALD. Serum leucine aminopeptidase activity in hepatobiliary and pancreatic disease, 417

BREUCHAUD, JANET SPALDING (*See* PHILLIPS, LUDDECKE, BREUCHAUD, AND LENAHAN), 659
BREWER, GEORGE J., TARLOV, ALVIN R., AND KELLERMEYER, ROBERT W. Role of methemoglobin in mechanism of drug induced hemolysis associated with glucose-6-phosphate dehydrogenase deficiency, 796 (Abst.)
BRICKER, NEAL S. (*See* MORRIN, BRICKER, KIME, NEWMARK, AND GEDNEY), 931 (Abst.)
BRIGGS, DAVID R. (*See* BLOCH, PRASAD, ANASTASI, AND BRIGGS), 212
—. (*See* ZINNEMAN, BRIGGS, HALL, AND GLENCHUR), 960 (Abst.)
BRIGGS, DICK D., JR. (*See* HARFORD, HAMLIN, AND BRIGGS), 824 (Abst.)
BROBST, MARY E. (*See* EVANS AND BROBST), 809 (Abst.)
BRONSKY, DAVID (*See* LEE, MORIMOTO, BRONSKY, AND WALDSTEIN), 920 (Abst.)
—, KAPLITZ, SHERMAN E., MUCI JOSEPH, DUBIN, ALVIN, AND CHESROW, EUGENE J. Electrophoretic partition of cerebrospinal fluid and serum proteins in muliple sclerosis, 382

SUBJECT INDEX*†

A

A_2-hemoglobin, antigenicity, 826 (Abst.)
Acid, bile, excretion in man after ingestion of corn oil, 809 (Abst.)
concentration, lowering serum bile, and relief of pruritus in jaundiced patient fed bile acid sequestering resin, 797 (Abst.)
fatty, effect of glucose upon release, by adipose tissue, 930 (Abst.)
nucleic, synthesis in human bone marrow and leukemic cells, patterns of inhibition by chloramphenicol, 831
phosphatase test for evaluation of androgen activity, rapid, 918 (Abst.)
uric, administered intravenously to Dalmatian dogs, rate of disappearance from plasma, 805 (Abst.)
Acidosis, renal tubular, and nephrocalcinosis, excretion of citrate in patients with, 802 (Abst.)
Acids, fatty, individual, extraction, by heart, 942 (Abst.)
nucleic, influx, into marrow cells and effect on hemoglobin electrophoresis, 957 (Abst.)
plasma unesterified fatty, and nitrogen metabolism, effects of glucagon on, 342
total alpha amino, in urine, colorimetric ninhydrin method for, 321
Adenovirus infection in civilian population, study, by use of complement fixation reaction, 796 (Abst.)
vaccine: adjuvant polyvalent influenza, 927 (Abst.)
Adipokinetic substance, potent, isolation from urine, 924 (Abst.)
Adipose tissue and liver glycogen in rats limited to short daily feeding period, 827 (Abst.)
Adrenal steroid hormone production, reduction, by inhibitor of cholesterol biosynthesis, 927 (Abst.)
Adrenocortical function after long-term corticoid therapy, 235
hyperfunction, effects of corticosteroids on serum lipids and lipoproteins in, 665
Albumin, I^{131}-labeled, differentiation of massive pericardial effusion from cardiac dilatation using, 933 (Abst.)
Aldosterone, progesterone-, interrelationships in pregnancy 806 (Abst.)
Alloxan-diabetic hypophysectomized rats, increased uptake of sulfate by cartilage in vitro after treatment, with growth hormone, 682
Alpha amino acids, total, in urine, colorimetric ninhydrin method for, 321
$Alpha_2$-type multiple myeloma, 44
Amino acids, alpha, total, of urine, colorimetric ninhydrin method for, 321
importance, in actions of insulin and serum sulfation factor to stimulate sulfate uptake by cartilage from hypophysectomized rats, 673
Aminopeptidase activity, serum leucine, in hepatobiliary and pancreatic disease, 417
Ammonia, blood, colorimetric determination, 766
and glucose in patients with leukemia, 925 (Abst.)
effect of alterations in blood pH on distribution, from blood to cerebrospinal fluid in patients in hepatic coma, 687
Amphotericin B, in vitro activity, on strains of mucoraceae pathogenic to man, 251
Amyloidosis, hereditary primary, serum hexosamine content and urinary acid mucopolysaccharide excretion in, 544
serum complement in, 629
Androgen activity, rapid acid phosphatase test for evaluation, 918 (Abst.)
Androgens, hepato-toxic effect of newer, 829 (Abst.)
Anemia of cirrhosis, 72
in primary pulminary hemosiderosis, erythrocyte destruction in lungs as major cause, 823 (Abst.)
"Anemic" and "polycythemic" plasmas, hemopoietic activity, 923 (Abst.)
Anti-D(Rh_o) typing, rapid mass, with bromelin, 911
Antibodies, blocking and agglutinating, molecular sizes, in human brucellosis, 960 (Abst.)
colon, in ulcerative colitis, 795 (Abst.)
fluorescent stainable, to Eaton agent in human primary atypical pneumonia: transmission studies, 799 (Abst.)

*Abstracts of articles read before the Central Society for Clinical Research are indicated by (Abst.).

†July, pp. 1-166; August, pp. 167-332; September, pp. 333-498; October, pp. 499-664, November, pp. 665-830; December, pp. 831-998.

Antibody deficiency with hypergammaglobulinemia in Felty's syndrome, 940 (Abst.)
fluorescent, technique, pathogenesis of experimental histoplasmosis employing, 937 (Abst.)
insulin transporting, and insulin effect, relationship between, 808 (Abst.)
response in patients with acute leukemia, 634
Anticholinergic drugs, alteration of pancreatic secretion by, 798 (Abst.)
Antigens, segregation, from human leukemic and tumoral cells by fluorocarbon extraction: detection by a gel diffusion method, 333
Antihemophilic globulin activity, assay, in carrier female, 613
Antihypertensive principle from renal medulla, further evidence in support, 932 (Abst.)
property in renoprival hypertension of extract from renal medulla, 167
Antimicrobial resistance, distribution and, of uropathogens, analysis of factors influencing, 821 (Abst.)
Antinuclear factors in serum of patients with systemic lupus erythematosus and their relatives, 936 (Abst.)
Antitumor properties of N,N'-bis-(3-bromopropionyl) and N,N'-bis-(3-chlorpropionyl) piperazine, 949 (Abst.)
Aorta, determination of constrictor substance in plasma by means of strip, as aid in differential diagnosis of renal vascular occlusive disease, 828 (Abst.)
Aortic mucopolysaccharides, functional activity, 839
Aortopulmonary shunt, measurement, by double indicator dilution curves, 207
Arginase activity of human leukocytes, 754
L-Arginine administration, effect, on renal excretion of electrolytes, 822 (Abst.)
Arterial disease, coronary, certain unique features of lipoprotein lipids in, 800 (Abst.)
Arteriovenous serotonin concentration in malignant syndrome, cardiac catheterization findings including, 787 (Abst.)
Artery, internal carotid, bilateral distribution of indicator in cerebral circulation of monkeys after injection into, 815 (Abst.)
Ascites associated with cirrhosis, development of renal failure during treatment, isotope studies, 798 (Abst.)
Aspirin, measurement of gastrointestinal blood loss in subjects taking, 717
Assay, animal, significance of vascular injurious factors in human plasma as determined by; influence of nutritional status, 355
Atherosclerosis, experimental, treatment, in rabbit with L,D. alpha (dimyristoyl) lecithin, 30
immunologic studies; effect of active immunization with polyvalent human beta lipoprotein antigens on serum lipids, proteins, and atherosclerosis in cholesterol-fed rabbits, 788 (Abst.)
Atria, human and guinea pig, effect of streptococcal enzymes upon contractility, 955 (Abst.)
Atrial and ventricular contraction, effect of variation in time delay between, on cardiac output in dogs with chronic A-V dissociation using electronic bypass for A-V bundle, 791 (Abst.)
Atrioventricular conduction, supernormal phase, in intact mammal, 811 (Abst.)

B

B_{12}, Co^{60}-labeled, detection of space occupying lesions of liver by directional counting, 290
Bacteriophage neutralization titers, serum complement and, in human infections, leukemias, and lymphomas, 594
on paper disks: Staphylococcus aureus, 777
Bacteriostatic and bactericidal activity of penicillin, erythromycin, tetracycline, and chloramphenicol in human serum, comparison, 820 (Abst.)
Beagle, metabolic responses after stereotaxic lesion in hypothalamus of, 803 (Abst.)
Bean, fava, hemolytic principle, 695
Bentonite, opsonification, by gamma globulin, 952 (Abst.)
Benzidine method for measurement of hemoglobin in plasma, further modification, 486
Bicarbonate reabsorption in dog with unilateral experimental pyelonephritis, 931 (Abst.)
in man, mechanism, 294
Bile acid concentration, serum, lowering, and relief of pruritus in jaundiced patients fed a bile acid sequestering resin, 797 (Abst.)
excretion in man after ingestion of corn oil, 809 (Abst.)
canaliculi, changes in, produced by norethandrolone: electron microscopic study of human and rat liver, 623
serum, pigment fractions during course of jaundice, 925 (Abst.)
Biochemical effects of direct and distant x-irradiation on radiosensitive tissues, 919 (Abst.)
properties of different elastins, 812 (Abst.)

Biologic, immunologic and, similarities of seropositive rheumatoid and nonrheumatoid disease sera: gel diffusion studies, 303
Biopsy, sponge, subcutaneous, connective tissue, influence of site of implantation on lipid content, 760
Biosynthesis, cholesterol, reduction in adrenal steroid hormone production by inhibitor, 927 (Abst.)
Bishydroxycoumarin induced hypoprothrombinemia, dihydrovitamin K_1 biphosphate in, 21
Blepharoptosis in myxedema, 920 (Abst.)
Blood ammonia, colorimetric determination, 766
and glucose in patients with leukemia, 925 (Abst.)
coagulation during sleep, 25
time, effect of prednisone on, in patients on Dicumarol therapy, 14
flow, capillary, pulmonary tissue volume and, measurement, by rebreathing method, 922 (Abst.)
cerebral, in humans, rapid and simple method for measuring rate, with $krypton^{85}$, 473
hepatic, estimation in man and in dogs by I^{131}-labeled rose bengal, 537
heparin activity in, natural occurring lipid that neutralizes, 277
human, sensitive test for physiologic variations in coagulability; thrombin generation, 955 (Abst.)
infrared analysis of carbon tetrachloride and ethanol in, 148
loss, gastrointestinal, in subjects taking aspirin, measurement, 717
micro-transfusions, homologous tissue reactions following, 930 (Abst.)
of patients treated with MER/29 sterols in, 793 (Abst.)
pH, effects of alterations, on distribution of ammonia from blood to cerebrospinal fluid in patients in hepatic coma, 687
platelets, human, osmotic fragility, 120
preservation, for transfusion; in vitro recovery after freezing and thawing of red cells modified with sugars, 576
posttransfusion survival of red cells modified with sugars, frozen, and stored in frozen state, 587
pressure responses to dopamine and norepinephrine, increased, produced by monoamine oxidase inhibitors in man, 747
serum, cerebrospinal fluid and, effect on tissue cultures, 431
Body fluids, new, rapid, and efficient method for measuring inert and chemically active gases in, by vapor phase chromatography, 958 (Abst.)
Body fluids—Cont'd
serum electrolytes, and exchangeable sodium in hypertensive patients, effects of long-term treatment of chlorothiazide, 401
and other, measurement of lecithinase A in, 959 (Abst.)
water, total, determination, with tritium oxide, 952 (Abst.)
Bone, human, mineral composition, in various clinical disorders, 520
marrow activity, in vivo utilization of tritiated thymidine as study, 816 (Abst.)
and leukemic cells, patterns of inhibition by chloramphenicol of nucleic acid synthesis in, 831
Bromelin, rapid mass anti-D(Rh_0) typing with, 911
Brucellosis, molecular sizes of blocking and agglutinating antibodies in human, 960 (Abst.)
precipitins in, 818 (Abst.)
Burned and injured human subjects, toxin-antitoxin phenomena in, 942 (Abst.)
Bypass, electronic, used for A-V bundle, effect of variation in time delay between atrial and ventricular contraction on cardiac output in dogs with chronic A-V dissociation, 791 (Abst.)

C

Calcium analysis, serum, routine, clinical value, 794 (Abst.)
excretion, urinary, Sulkowitch test and, 314
phosphate, and citrate excretion patterns of normal and hypoparathyroid subjects after calcium administration, 944 (Abst.)
serum and spinal fluid, changes, effected by disodium ethylenediaminetetraacetate, 947, (Abst.)
Canaliculi, bile, changes, produced by norethandrolone: electron microscopic study of human and rat liver, 623
Capillary blood flow, measurement of pulmonary tissue volume and, by rebreathing method, 922 (Abst.)
Carbohydrate metabolism altered with trauma, mechanisms, 805 (Abst.)
Carbon dioxide pool in man, 922 (Abst.)
tetrachloride and ethanol in blood, infrared analysis, 148
Carcinoid, metabolism of radioactive silver in patient with, 499
syndrome, malignant, cardiac catheterization findings including simultaneous arteriovenous serotonin concentration in, 787 (Abst.)

Cardiac catheterization findings including simultaneous arteriovenous serotonin concentration in malignant carcinoid syndrome, 787 (Abst.)
dilatation, differentiation of massive pericardial effusion from, using I^{131}-labeled albumin 933 (Abst.)
effects of dopamine, direct, 814 (Abst.)
output in dogs with chronic A-V dissociation using electronic bypass for A-V bundle, effect of variation of time delay between atrial and ventricular contraction on, 791 (Abst.)
Cardiopulmonary effects of extreme obesity, further studies, 787 (Abst.)
Carrier Diodrast, effects, on excretion of I^{131}-labeled Diodrast, 110
female, assay of antihemophilic globulin activity in, 613
heterozygous, in galactosemia, further studies, 368
Cartilage, increased uptake of sulfate by, in vitro after treatment of alloxan-diabetic hypophysectomized rats with growth hormone, 682
sulfate uptake by, from hypophysectomized rats, importance of amino acids in actions of insulin and serum sulfation factor to stimulate, 673
Catecholamines in patients with pheochromocytoma, 506
Catheterization, cardiac, findings including simultaneous arteriovenous serotonin concentration in malignant carcinoid syndrome, 787 (Abst.)
Cations, water, and peripheral vascular resistance, 934 (Abst.)
Cell-free filtrates from human leukocytes, production of leukemia in mice with, 891
Cells infected with reovirus, electron microscopic examination, 824 (Abst.)
marrow, influx of nucleic acids into, and effect on hemoglobin electrophoresis, 957 (Abst.)
Cellular nature of disaccharide and phosphate ester hydrolysis, 928 (Abst.)
Cerebral blood flow in humans, rapid and simple method for measuring rate, 473
Cerebrospinal fluid and blood serum, comparison of effect, on tissue cultures, 431
effect of alterations in blood pH on distribution of ammonia from blood to, in patients in hepatic coma, 687
and serum proteins, electrophoretic partition, in multiple sclerosis, 382
Ceruloplasmin, enzymatic properties, 222
Chloramphenicol, patterns of inhibition, of nucleic acid synthesis in human
Chloramphenicol—Cont'd
bone marrow and leukemic cells by, 831
penicillin, erythromycin, tetracycline, and, in human serum, comparison of bacteriostatic and bactericidal activity, 820 (Abst.)
Chlorothiazide, effect of long-term treatment with, on body fluids, serum electrolytes, and exchangeable sodium in hypertensive patients, 401
prevention of Stokes-Adams seizures by reducing plasma potassium with, 950 (Abst.)
Chlorpromazine, urinary excretion, in man, 570
Chlorpropamide, decrease in serum inorganic phosphorase in diabetic patients after long-term administration, 944 (Abst.)
Cholesterol biosynthesis, reduction in adrenal steroid hormone production by inhibitor, 927 (Abst.)
-fed rabbits, effect of active immunization with polyvalent human beta lipoprotein antigens on serum lipids, proteins, and atherosclerosis in, 788 (Abst.)
serum: relation of degree of esterification to lipoprotein density and concentration as influenced by gonadal steroids, 817 (Abst.)
Chromatography, vapor phase, new, rapid, and efficient method for measuring inert and chemically active gases in body fluids by, 958 (Abst.)
Chronic Toxoplasma infection in uterus, 879
Cigarette smoke, effect of in vivo, on surface tension of extracts of rat lungs, 929 (Abst.)
Circulation, cerebral, of monkeys, bilateral distribution of indicator in, after injection into internal carotid artery, 815 (Abst.)
of man, effects of dry heat on, 951 (Abst.)
Circulations, systemic and coronary, hemodynamic effects of β methyl 2, 6-dimethylphenylether (S K F 6890) on, 409
Cirrhosis, anemia, 72
development of renal failure during treatment of ascites associated with, isotope studies, 798 (Abst.)
hepatic, metabolic defect in patients with, which is reversed by cytidine and uridine, 807 (Abst.)
of liver, pulmonary venoarterial admixture in: possible site of pulmonary shunting, 790 (Abst.)
Citrate, calcium, phosphate, and, excretion patterns in normal and hypopara-

Citrate—Cont'd
thyroid subjects after calcium administration, 944 (Abst.)
excretion, in patients with renal tubular acidosis and nephrocalcinosis, 802 (Abst.)
Clotting factors in plasma, effect of plasmin in vitro, 644
Co^{60}-labeled B_{12}, detection of space occupying lesions of liver by directional counting, 290
Coagulability of human blood, sensitive test for physiologic variations in; thrombin generation, 955 (Abst.)
Coagulase-positive staphylococci, isolation and identification, on Levine's eosin-methylene blue agar, 908
Coagulation, blood, during sleep, 25
time, blood, effect of prednisone on, in patients on Dicumarol therapy, 14
Colitis, ulcerative, colon antibodies in, 795 (Abst.)
Colorimetric method for determination of erythrocyte glutathione, 157
ninhydrin method for total alpha amino acids of urine, 321
Colorimetry versus fluorometry: clinical comparison of two methods for determining plasma free corticosteroids, 946 (Abst.)
Coma, hepatic, effect of alteration in blood pH on distribution of ammonia from blood to cerebrospinal fluid in patients in, 687
Complement fixation reaction, study of adenovirus infection in civilian population by use of, 796 (Abst.)
serum, in amyloidosis, 629
and bacteriophage neutralization titers in human infections, leukemias, and lymphomas, 594
Conduction, atrioventricular, supernormal phase, in intact mammal, 811 (Abst.)
Constrictor substance in plasma, determination, by means of strip of rabbit aorta as aid in differential diagnosis of renal vascular occlusive disease, 828 (Abst.)
Contamination, radiosodium, of standard preparation of reactor produced radiopotassium: nature, amount, and significance in biologic work, 127
Contraction, atrial and ventricular, effect of variation in time delay between, on cardiac output in dogs with chronic A-V dissociation using electronic bypass for A-V bundle, 791 (Abst.)
Coproporphyrin isomers I and III, infrared method for determination of ratio, 652
Cord, spinal, sectioning, method for maintaining orientation, 894
Corn oil, bile acid excretion in man after ingestion, 809 (Abst.)
Coronary arterial disease, certain unique features of lipoprotein lipids in, 800 (Abst.)
systemic and, circulations, hemodynamic effects of β methyl 2,6-dimethylphenylether of choline (SKF 6890) on, 409
and, hemodynamic effects of sodium lactate, 874
pulmonary and hemodynamics and metabolism of intact dog, effect of endotoxin (Serratia marcescens), 38
Corticoid therapy, long-term, adrenocortical function after, 235
Corticosteroid therapy, effect of nitrogen and mineral metabolism in patients on, 954 (Abst.)
Corticosteroids, effects, on serum lipids and lipoproteins in adrenocortical hyperfunction, 665
plasma free, clinical comparison of two methods for determining; fluorometry versus colorimetry, 946 (Abst.)
Cortisol, secretion and metabolism, after injection of endotoxin, 50
Counting, directional, of Co^{60}-labeled B_{12}, detection of space occupying lesions of liver, 290
Coxsackie A-9 infections, cutaneous and pulmonary lesions in, 921 (Abst.)
Creatinine excretion, effect of diet on, 793 (Abst.)
Culture of urine, 899
Cultures, tissue, comparison of effects of cerebrospinal fluid and blood serum on, 431
Cutaneous and pulmonary lesions in Coxsackie A-9 infections, 921 (Abst.)
Cyanocobalamin, preferential retention of hydroxocobalamin over, in humans, 917 (Abst.)
radiolabeled, distribution of radioactivity in man after ingestion of small test doses, 547
Cycloserine: growth enhancement phenomenon found during sensitivity studies: clinical implications, 607
Cystic fibrosis of pancreas, nature of lipid disturbance in, 828 (Abst.)
Cytidine and uridine, metabolic defect in hepatic cirrhosis which is reversed by, 807 (Abst.)

D

Dalmatian dogs, rate of disappearance from plasma of uric acid administered intravenously to, 805 (Abst.)

Delvex (See Dithiazinine iodide)
Depression, drug induced erythropoietic, early detection, 453
Diabetes, lipoatrophic: isolation from urine of potent adipokinetic substance, 924 (Abst.)
mellitus, experimental, effect of rate of ingestion of diet on control, 801 (Abst.)
relationship between retinopathy and physiologic type in, 811 (Abst.)
Diabetic, alloxan-, hypophysectomized rats, increased uptake of sulfate by cartilage in vitro after treatment, with growth hormone, 682
patients, adult onset, exhaustion of insulogenic reserve in, during prolonged and continuous hyperglycemic stress, 945 (Abst.)
decrease in serum inorganic phosphorus in, after long-term administration of chlorpropamide, 944 (Abst.)
Diagnostic test, simplified, for galactosemia, 483
Diaphragms, uptake of thyroxine and triiodothyronine by rat, in vitro, 804 (Abst.)
Dicumarol therapy, effect of prednisone on blood coagulation time in patients on, 14
Diet, effect on creatinine excretion, 793 (Abst.)
rate of ingestion, effect on control of experimental diabetes mellitus, 801 (Abst.)
Differential analysis of stages of hepatic excretory function with gamma emitting isotopes; attempts to alter rate phenomena, 193
methods and validation, 181
Digestive surface in small intestine, concept: cellular nature of disaccharide and phosphate ester hydrolysis, 928 (Abst.)
Digitalis, electrocardiogram and use of intact guppy (Lebistes reticulatus) for electrobioassay, 956 (Abst.)
Dihydrostreptomycin, oleandomycin, vancomycin, or, erythromycin in combination with, rate of development of resistance in Staphylococcus aureus to, 83
Dihydrovitamin K_1 biphosphate in bishydroxycoumarin induced hypoprothrombinemia, 21
Diidotyrosine metabolism, effect of liver disease on, 446
Diisopropylfluorophosphate (DFP), inactivation of Hageman factor by, 136
Dimyristoyl (L,D. alpha) lecithin, treatment of experimental atherosclerosis in rabbit with, 30
Diodrast, carrier, effects, on excretion of I^{131}-labeled Diodrast, 110
I^{131}-labeled, influence of serum protein binding on renal clearance, 463
Disaccharide and phosphate ester hydrolysis, cellular nature, 928 (Abst.)
Dithiazinine iodide and pyrvinium pamoate in treatment of enterobiasis (pinworms), comparison, 413
Diuretic, osmotic, treatment of "refractory" nephrotic syndrome, 792 (Abst.)
Dopamine, direct cardiac effects, 814 (Abst.)
and norepinephrine, increased blood pressure responses to, produced by monoamine oxidase inhibitors in man, 747
Double indicator dilution curves, measurement of aortopulmonary shunt by, 207
Drug induced erythropoietic depression, early detection, 453
hemolysis associated with glucose-6-phosphate dehydrogenase deficiency, role of methemoglobin in mechanism, 796 (Abst.)
Drugs, anticholinergic, alteration of pancreatic secretion by, 798 (Abst.)
Dynamics, esophageal vestibular, in apparent hiatal hernias, identification, 813 (Abst.)

E

Eaton agent, fluorescent stainable antibodies to, in human primary atypical pneumonia: transmission studies, 799 (Abst.)
Effusion, massive pericardial, differentiation, from cardiac dilatation using I^{131}-labeled albumin, 933 (Abst.)
Elastins, biochemical properties of different, 812 (Abst.)
Electrocardiogram and use of intact guppy (Lebistes reticulatus) for electrobioassay of digitalis, 956 (Abst.)
Electrolytes, effect of L-arginine administration on renal excretion, 822 (Abst.)
serum, body fluids, and exchangeable sodium in hypertensive patients, effects of long-term treatment with chlorothiazide, 401
Electron microscopic examination of cells infected with reovirus, 824 (Abst.)
study of human and rat liver: changes in bile canaliculi produced by norethandrolone, 623
Electronic bypass for A-V bundle, using, effect of variation in time delay between atrial and ventricular contraction on cardiac output in dogs with chronic A-V dissociation, 791 (Abst.)

Electrophoresis, hemoglobin, influx of nucleic acids into marrow cells and effect on, 957 (Abst.)
Electrophoretic partition of cerebrospinal fluid and serum proteins in multiple sclerosis, 382
Endotoxin, secretion and metabolism of cortisol after injection, 50
(Serratia marcescens), effect, upon systemic, pulmonary, and coronary hemodynamics and metabolism of intact dog, 38
shock in primate, 818 (Abst.)
trigger mechanism involved in vascular alteration induced by, 953 (Abst.)
Environmental substances, correlation of sexuality with susceptibility and exposure to, 939 (Abst.)
Enzymatic estimation of erythrocytic galactose-1-phosphate, 161
properties of ceruloplasmin, 222
Enzymes, streptococcal, effect, upon contractility of human and guinea pig atria, 955 (Abst.)
Erythrocyte destruction in lungs as major cause for anemia in primary pulmonary hemosiderosis, 223 (Abst.)
glutathione, colorimetric method for determination, 157
lipids; quantitative analysis of lipids of normal human red blood cells, 281
Rh_0(D) antigen, failure of Rh_0(D) genotype to influence, 789 (Abst.)
Erythrocytes modified with sugars, frozen, and stored in frozen state, post-transfusion survival; preservation of blood for transfusion, 587
in vitro recovery after freezing and thawing; preservation of blood for transfusion, 576
Erythrocytic galactose-1-phosphate, enzymatic estimation, 161
Erythrokinetic studies in thalassemia trait, 866
Erythrol tetranitrate, systemic and coronary hemodynamic effects, 943 (Abst.)
Erythromycin in combination with oleandomycin, vancomycin, or dihydrostreptomycin, development of resistance in Staphylococcus aureus to, 83
penicillin, tetracycline, and chloramphenicol in human serum, comparison of bacteriostatic and bactericidal activity, 820 (Abst.)
Erythropoiesis, role of kidneys in, 940 (Abst.)
Erythropoietic depression, drug induced, early detection, 453
effect of tissue homogenates, 938 (Abst.)
Esophageal vestibular dynamics in apparent hiatal hernias, identification, 813 (Abst.)
Esterification, relation of degree, to lipoprotein density and concentration as influenced by gonadal steroids: serum cholesterol, 817 (Abst.)
Ethanol, carbon tetrachloride and, in blood, infrared analysis, 148
Ethylenediaminetetraacetate, disodium, changes in serum and spinal fluid calcium effected by, 947 (Abst.)
Exchangeable sodium, body fluids, serum electrolytes and, effects of long-term treatment with chlorothiazide, in hypertensive patients, 401
Excretion, creatinine, effect of diet on, 793 (Abst.)
urinary calcium, Sulkowitch test and, 314
Excretory function, hepatic, differential analysis with gamma emitting isotopes; attempts to alter rate phenoma, 193
methods and validation, 181
Extracellular fluid, effect in dogs of large water load upon volume and composition, 830 (Abst.)
Extract from renal medulla, antihypertensive property in renoprival hypertension, 167
Extraction, fluorocarbon, segregation of antigens from human leukemic and tumoral cells by; detection by gel diffusion, 333
Extracts, protein, of trophoblastic tumors in man, gonadotropic hormone distribution in, 258
Extraocular muscle, skeletal muscle, and thyroid gland mucopolysaccharide response to thyroid stimulating hormone, 790 (Abst.)

F

Factor, Hageman, inactivation, by diisopropylfluorophosphate, 136
Factors, vascular injurious, in human plasma as determined by animal assay, significance; influence of nutritional status, 355
Fat, intravenous; role of human serum lipoproteins in lipid transport, 918 (Abst.)
Fatty acid, effect of glucose upon release, by adipose tissue, 930 (Abst.)
acids, individual, extraction, by heart, 942 (Abst.)
plasma unesterified, and nitrogen metabolism, effects of glucagon on, 342
Fava bean, hemolytic principle, 695
Feeding period, short daily, adipose tissue and liver glycogen in rats limited to, 827 (Abst.)
Felty's syndrome, antibody deficiency with hypergammaglobulinemia in, 940 (Abst.)

Fibrin polymerization, defective; its pathogenesis and clinical significance, 813 (Abst.)
Fluorescence microscopy in study of megakaryocytes in thrombocytopenic purpura, 935 (Abst.)
Fluorescent antibody technique, pathogenesis of experimental histoplasmosis employing, 937 (Abst.)
stainable antibodies to Eaton agent in human primary atypical pneumonia: transmission studies, 799 (Abst.)
Fluorocarbon extraction, segregation of antigens from human leukemic and tumoral cells by; detection by gel diffusion, 333
Fluorometry versus colorimetry: clinical comparison of two methods for determining plasma free corticosteroids, 946 (Abst.)
Forearm vascular responses to graded doses of norepinephrine, effect of guanethidine on, 786 (Abst.)
Fragility, osmotic, of human blood platelets, 120
and thromboplastin generation studies of platelets in patients with thrombocytopenia, phase and electron microscopy, 816 (Abst.)
Furadantin (See Nitrofurantoin)

G

Galactose-1-phosphate, erythrocytic, enzymatic, estimation, 161
Galactosemia, hetrozygous carrier in, further studies, 368
simplified diagnostic test, 483
Gamma emitting isotopes, differential analysis of stages of hepatic excretory function with; attempts to alter rate phenomena, 193
methods and validation, 181
globulin in experimental staphylococcal infections, 701
opsonification of bentonite particles, 952 (Abst.)
Gases, inert and chemically active, new, rapid, and efficient method of measuring, in body fluids by vapor phase chromatography, 958 (Abst.)
Gastritis, atrophic, experimental production by presumably immunologic mechanism, 826 (Abst.)
Gastrointestinal blood loss in subjects taking aspirin, measurement, 717
Gel diffusion method, detection of segregation of antigens from human leukemic and tumoral cells by fluorocarbon extraction, 333
studies: immunologic and biologic similarities of seropositive rheumatoid and nonrheumatoid disease sera, 303
Gland, thyroid, extraocular muscle, skeletal muscle, and mucopolysaccharide response to thyroid stimulating hormone, 790 (Abst.)
Globulin, antihemophilic, activity, assay, in carrier female, 613
Glucagon, effects, on plasma unesterified fatty acids and in nitrogen metabolism, 342
Glucose, blood ammonia and, in patients with leukemia, 925 (Abst.)
effect, upon release of fatty acid by adipose tissue, 930 (Abst.)
output, hepatic, in man, prompt effect of exogenous insulin, 801 (Abst.)
Glucose-6-phosphate dehydrogenase deficiency, role of methemoglobin in mechanism of drug induced hemolysis associated with, 796 (Abst.)
Glutathione, erythrocyte, colorimetric mehod for determination, 157
reductase, inhibition, by nitrofurantoin, 884
Glycogen, liver, adipose tissue and, in rats limited to short daily feeding period, 827 (Abst.)
Gonadal steroids, relation of degree of esterification to lipoprotein density and concentration as influenced by, 817 (Abst.)
Gonadotropic hormone distribution in protein extracts of trophoblastic tumors in man, 258
Group A, type 12 streptococci, nephropathy in mice after exposure to, 265
Growth enhancement phenomenon found during sensitivity studies: clinical implications: cycloserine, 607
Guanethidine, effect on forearm vascular responses to graded doses of norepinephrine, 786 (Abst.)

H

Hageman factor, inactivation, by diisopropylfluorophosphate (DFP), 136
Heart, extraction of individual fatty acids by, 942 (Abst.)
rate, size, and tension, effects: myocardial oxygen uptake and efficiency, 941 (Abst.)
Heat, dry, effects, on circulation of man, 951 (Abst.)
Hemodynamic effects of β methyl 2,6-dimethylphenylether of choline (SKF 6890) on systemic and coronary circulations, 409
systemic and coronary, of erythrol tetranitrate, 943 (Abst.)
studies in man before and after three chemical agents which block sympathetic neural activity, 959 (Abst.)
Hemodynamics and metabolism, systemic, pulmonary, and coronary, of

Hemodynamics—Cont'd
intact dog, effect of endotoxin (Serratia marcescens), 38
Hemoglobin electrophoresis, influx of nuleic acids into marrow cells and effect on, 957 (Abst.)
in plasma, further modification of benzidine method for measurement, 486
Hemolysis, drug induced, associated with glucose-6-phosphate dehydrogenase deficiency, role of methemoglobin in mechanism, 796 (Abst.)
Hemolytic principle of fava bean, 695
Hemopoietic activity of "anemic" and "polycythemic" plasmas, 923 (Abst.)
Hemorrhagic shock, effect, upon properdin system of dog, 105
Hemosiderosis, primary pulmonary, erythrocyte destruction in lungs as major cause for anemia in, 823 (Abst.)
Heparin activity in blood, natural occurring lipid that neutralizes, 277
Hepatic blood flow, estimation, in man and in dogs by I^{131}-labeled rose bengal, 537
cirrhosis, metabolic defect in patients with, which is reversed by cytidine and uridine, 807 (Abst.)
coma, effect of alterations in blood pH on distribution of ammonia from blood to cerebrospinal fluid in patients in, 687
excretory function, differential analysis, with gamma emitting isotopes: attempts to alter rate phenomena, 193
methods and validation, 181
glucose output in man, prompt effect of exogenous insulin, 801 (Abst.)
Hepatobiliary and pancreatic disease, serum leucine aminopeptidase activity in, 417
Hepato-toxic effect of newer androgens, 829 (Abst.)
Hernias, apparent hiatal, identification of esophageal vestibular dynamics in, 813 (Abst.)
Heterozygous carrier in galactosemia, further studies, 368
Hexosamine, serum, content and urinary acid mucopolysaccharide excretion in hereditary primary amyloidosis, 544
Hippuran, radioiodinated, use, for individual kidney function tests, 438
Histoplasmin sensitivity in Israel, 133
Histoplasmosis, experimental, pathogenesis, employing fluorescent antibody technique, 937 (Abst.)
Homogenates, human tissue, ornithine carbamyl transferase activity in, 218
Homotransplantation in identical twins, functional status of denervated kidney after, 1
Hormone, adrenal steroid, production, reduction, by inhibitor of cholesterol biosynthesis, 927 (Abst.)
gonadotropic, distribution in protein extracts of trophoblastic tumors in man, 258
growth, increased uptake of sulfate by cartilage in vitro after treatment of alloxan-diabetic hypophysectomized rats with, 682
thyroid stimulating, extraocular muscle, skeletal muscle, and thyroid gland mucopolysaccharide response to, 790 (Abst.)
Hospital, staphylococcal transfer in, influence of neomycin-bacitracin nasal ointment on, 921 (Abst.)
Hyaluronidase, induction by, of tolerance to maternal tissue in rabbits, 928 (Abst.)
Hydrolysis, disaccharide and phosphate ester, cellular nature, 928 (Abst.)
Hydroxocobalamin, preferential retention, over cyanocobalamin in humans, 917 (Abst.)
Hyperfunction, adrenocortical, effects of corticosteroids on serum lipids and lipoproteins in, 665
Hypergammaglobulinemia in Felty's syndrome, antibody deficiency with, 940 (Abst.)
Hyperglycemic stress, exhaustion of insulogenic reserve in adult onset diabetic patients during prolonged and continuous, 945 (Abst.)
Hypersensitivity, delayed failure of passive transfer, in newborn human infant, 139
Hypertension, renoprival, antihypertensive property in, of extract from renal medulla, 167
Hypertensive patients, effects of long-term treatment with chlorothiazide on body fluids, serum electrolytes, and exchangeable sodium in, 401
Hyperthyroidism, stroke volume and ventricular dynamics in, and modification by reserpine administration, 803 (Abst.)
Hypocholesterolemic agents—comparative study, 924 (Abst.)
Hypoglycemia, leucine, mechanism, 810 (Abst.)
Hypoparathyroid, subjects, normal and, calcium, phosphate, and citrate excretion patterns, after calcium administration, 944 (Abst.)
Hypophysectomized, alloxan-diabetic, rats, increased uptake of sulfate by cartilage in vitro after treatment with growth hormone, 682

Hypophysectomized—Cont'd
rats, importance of amino acids in actions of insulin and serum sulfation factor to stimulate sulfate uptake by cartilage from, 673
Hypoprothrombinemia, bishydroxycoumarin induced, dihydrovitamin K_1 biphosphate in, 21
Hypothalamus, stereotaxic lesion in, of beagle, metabolic responses after, 803 (Abst.)
Hypoxia, effects, on peripheral venous tone in man, 847

I

I^{131}-labeled albumin, differentiation of massive pericardial effusion from cardiac dilatation using, 933 (Abst.)
Diodrast, effects of carrier Diodrast on excretion, 110
influence of serum protein binding on renal clearance, 463
rose bengal, estimation of hepatic blood flow in man and in dogs by, 537
Immunization, active, with polyvalent human beta lipoprotein antigens on serum lipids, proteins, and atherosclerosis in cholesterol-fed rabbits, 788 (Abst.)
Immunologic and biologic similarities of seropositive rheumatoid and nonrheumatoid disease sera: gel diffusion studies, 303
mechanism, experimental production of atrophic gastritis by, 826 (Abst.)
studies in atherosclerosis; effect of active immunization with polyvalent human beta lipoprotein antigens on serum lipids, proteins, and atherosclerosis in cholesterol-fed rabbits, 788 (Abst.)
Implantation, influence of site, on lipid content of subcutaneous sponge biopsy connective tissue, 760
Inactivation of Hageman factor by diisopropylfluorophosphate, 136
India ink, thrombocytopenia after intravenous injection, 711
Indicator, bilateral distribution, in cerebral circulation of monkeys after injection into internal carotid artery, 815 (Abst.)
double, dilution curves, measurement of aortopulmonary shunt by, 207
Influenza, adjuvant polyvalent—adenovirus vaccine, 927 (Abst.)
Infrared analysis of carbon tetrachloride and ethanol in blood, 148
of serum protein from one hundred and five healthy adults, 391
method for determination of ratio of coproporphyrin isomers I and III, 652
Infusion of autologous and nonautologous plasma in man, plasma volume expansion and reactions after, 734
Ingestion of corn oil, bile acid excretion in man after, 809 (Abst.)
rate, effect, on control of experimental diabetes mellitus, 801 (Abst.)
Inhibition of glutathione reductase by nitrofurantoin, 884
patterns, by chloramphenicol of nucleic acid synthesis in human bone marrow and leukemic cells, 831
Injection into internal carotid artery, bilateral distribution of indicator in cerebral circulation of monkeys after, 815 (Abst.)
Injured, burned and, human subjects, toxin-antitoxin phenomena in, 942 (Abst.)
Inosine, effect, on myocardial metabolism, 794 (Abst.)
Insulin, exogenous, prompt effect, on hepatic glucose output in man, 801 (Abst.)
heterologous, renal lesions induced by: example of foreign protein nephritis, 819 (Abst.)
and serum sulfation factor, actions, importance of amino acids in, to stimulate sulfate uptake by cartilage from hypophysectomized rats, 673
transporting antibody and insulin effect, relationship between, 808 (Abst.)
Insulogenic reserve, exhaustion, in adult onset diabetic patients during prolonged and continuous hyperglycemic stress, 945 (Abst.)
Intestine, small, concept of digestive surface in: cellular nature of disaccharide and phosphate ester hydrolysis, 928 (Abst.)
Intoxicated, vitamin D, potassium depleted and, rats, concentrating ability of kidney: renal distribution of sodium and potassium, 807 (Abst.)
Iodopyracet (*See* Diodrast)
Iron absorption, lowering of transferrin during, in iron deficiency, 555
Isolation and identification of coagulase-positive staphylococci on Levine's eosin-methylene blue agar, 908
Isomers I and III, coproporphyrin, infrared method for determination of ratio, 652
Isotope studies on development of renal failure during treatment of ascites associated with cirrhosis, 798 (Abst.)
Isotopes, gamma emitting, differential analysis of stages of hepatic excretory function with; attempts to alter rate phenomena, 193
methods and validation, 181
Israel, histoplasmin sensitivity in, 133

J

Jaundice, serum bile pigment fractions during course, 925 (Abst.)
Jaundiced patients fed bile acid sequestering resin, relief of pruritus in, lowering of serum bile acid concentrations and, 797 (Abst.)
Jejunal mucosa, morphologic alterations in: malabsorptive syndrome induced by neomycin, 245

K

Kidney, concentrating ability, in potassium depleted and vitamin D intoxicated rats: renal distribution of sodium and potassium, 807 (Abst.)
denervated, functional status, after homotransplantation in identical twins, 1
function tests, individual, use of radioiodinated Hippuran for, 438
human placenta and, similar or identical connective tissue antigens in, 948 (Abst.)
Kidneys, role, in erythropoiesis, 940 (Abst.)
Krypton^{85}, rapid and simple method for measuring rate of cerebral blood flow in humans with, 473

L

L,D. alpha (dimyristoyl) lecithin, treatment of experimental atherosclerosis in rabbit with, 30
Lebistes reticulatus (guppy), electrocardiogram and use of intact, for electrobioassay of digitalis, 956 (Abst.)
Lecithin, L,D. alpha (dimyristoyl), treatment of experimental atherosclerosis in rabbit with, 30
Lecithinase A, measurement, in serum and other body fluids, 959 (Abst.)
Lesion, sterotaxic, in hypothalamus of beagle, metabolic responses after, 803 (Abst.)
Lesions, cutaneous and pulmonary, in Coxsackie A-9 infections, 921 (Abst.)
of liver, space occupying, detection, by directional counting of Co^{60}-labeled B_{12}, 290
renal, induced by heterologous insulin: example of foreign protein nephritis, 819 (Abst.)
Leucine aminopeptidase, serum, activity, in hepatobiliary and pancreatic disease, 417
hypoglycemia, mechanism, 810 (Abst.)
Leukemia, acute, antibody response in patients with, 634
blood ammonia and glucose in patients with, 925 (Abst.)
production, in mice with cell-free filtrates from human leukocytes, 891
Leukemias, infections, and lymphomas, serum complement and bacteriophage neutralization titers in, 594
Leukemic cells, bone marrow and, patterns of inhibition by chloramphenicol of nucleic acid synthesis in, 831
and tumoral cells, segregation of antigens from, by fluorocarbon extraction; detection by gel diffusion, 333
Leukocyte separation, simple method, 310
Leukocytes, human, arginase activity, 754
Levine's eosin-methylene blue agar, isolation and identification of coagulase-positive staphylococci on, 908
Lipid content of subcutaneous sponge biopsy connective tissue, influence of site of implantation, 760
disturbance in cystic fibrosis of pancreas, studies on nature, 828 (Abst.)
natural occurring, that neutralizes heparin activity in blood, 277
Lipids of erythrocyte, studies; quantitative analysis of lipids of normal red blood cells, 281
lipoprotein, in coronary arterial disease, certain unique features, 800 (Abst.)
and lipoproteins, serum, effects of corticosteroids, in adrenocortical hyperfunction, 665
Lipoatrophic diabetes: isolation from urine of potent adipokinetic substance, 924 (Abst.)
Lipoprotein antigens, polyvalent human beta, effect of active immunization with, on serum lipids, proteins, and atherosclerosis in cholesterol-fed rabbits, 788 (Abst.)
density and concentration as influenced by gonadal steroids, relation of degree of esterification to: serum cholesterol, 817 (Abst.)
lipids in coronary arterial disease, certain unique features, 800 (Abst.)
Lipoproteins, role, of human serum, in lipid transport: studies with intravenous fat, 918 (Abst.)
serum lipids and, effect of corticosteroids, in adrenocortical hyperfunction, 665
Liver, cirrhosis, pulmonary venoarterial admixture in: possible site of pulmonary shunting, 790 (Abst.)
disease, effect, on diidotyrosine metabolism, 446
glycogen, adipose tissue and, in rats limited to short daily feeding period, 827 (Abst.)
human and rat, electron microscopic study: changes in bile canaliculi produced by norethandrolone, 623
space occupying lesions, detection by directional counting of Co^{60}-labeled B_{12}, 290

Lungs, erythrocyte destruction in, as major cause for anemia in primary pulmonary hemosiderosis, 823 (Abst.)
extracts of rat, effect of in vivo cigarette smoke on surface tension, 929 (Abst.)
Lupus erythematosus, systemic, antinuclear factors in serum of patients with, and their relatives, 936 (Abst.)
Lymphomas, human infections, leukemias, and, serum complement and bacteriophage neutralization titers in, 594

M

Macroglobulinemia, Waldenström's, serum protein changes in, during administration of low molecular weight thiol (penicillamine), 212
Magnesium deficient rats, renal function in, 947 (Abst.)
Malabsorptive syndrome induced by neomycin: morphologic alterations in jejunal mucosa, 245
Marrow, bone, activity, in vivo utilization of tritiated thymidine as study, 816 (Abst.)
and leukemic cells, patterns of inhibition by chloramphenicol of nucleic acid synthesis in, 831
cells, influx of nucleic acids into, and effect of hemoglobin electrophoresis, 957 (Abst.)
Maternal tissue, induction by hyaluronidase of tolerance to, in rabbits, 928 (Abst.)
Meal, accompanying, effect of alterations in, on rate of absorption of radioiodine-labeled triolein, 950 (Abst.)
Mechanism of bicarbonate reabsorption in man, studies, 294
of leucine hypoglycemia, 810 (Abst.)
Mechanisms by which carbohydrate metabolism is altered with trauma, 805 (Abst.)
Medulla, renal, extract from, antihypertensive property in renoprival hypertension, 167
further evidence in support of antihypertensive principle from, 932 (Abst.)
Megakaryocytes in thrombocytopenic purpura, fluorescence microscopy in study of, 935 (Abst.)
Meningitis, aseptic, or nonparalytic poliomyelitis? 943 (Abst.)
Meperidine and secobarbital, effect, upon renal excretion of water and solute in man, 727
MER/29, sterols in blood of patients treated with, 793 (Abst.)
Metabolic defect in patients with hepatic cirrhosis which is reversed by cytidine and uridine, 807 (Abst.)
effects of high and massive doses of prednisone, comparison, 63
Metabolic—Cont'd
responses after stereotaxic lesion in hypothalamus of beagle, 803 (Abst.)
Metabolism, carbohydrate, altered with trauma, mechanisms, 805 (Abst.)
diiodotyrosine, effect of liver disease on, 446
hemodynamics and, systemic, pulmonary, and coronary, of intact dog, effect of endotoxin (Serratia marcescens) upon, 38
myocardial, effect of inosine on, 794 (Abst.)
nitrogen, effects of glucagon on plasma unesterified fatty acids and, 342
of radioactive silver in patient with carcinoid, 499
radiocalcium, in human disuse osteoporosis, 825 (Abst.)
secretion and, of cortisol after injection of endotoxin, 50
Methemoglobin, role, in mechanism of drug induced hemolysis associated with glucose-6-phosphate dehydrogenase deficiency, 796 (Abst.)
β-Methyl 2,6-dimethylphenylether of choline (SKF 6890), hemodynamic effects, on systemic and coronary circulations, 409
Microclotting techniques, 780
Micromethod for determination of prothrombin activity, 659
Microscopic, electron, examination of cells infected with reovirus, 824 (Abst.)
Microscopy, phase and electron, osmotic fragility and thromboplastin generation studies of platelets in patients with thrombocytopenia, 816 (Abst.)
fluorescence, in study of megakaryocytes in thrombocytopenic purpura, 935 (Abst.)
Micro-transfusions of blood, homologous tissue reactions following, 930 (Abst.)
Mineral composition of human bone in various clinical disorders, 520
nitrogen and, metabolism in patients on corticosteroid therapy, effect of anabolic steroids on, 954 (Abst.)
Molecular sizes of blocking and agglutinating antibodies in human brucellosis, 960 (Abst.)
Monoamine oxidase, inhibitors increased blood pressure responses to dopamine and norepinephrine produced by, in man, 747
Monodeiodination, L-thyroxine, inhibition, by thyroxine analogues, 919 (Abst.)
Morphologic alterations in jejunal mucosa: malabsorptive syndrome induced by neomycin, 245
Mucopolysaccharide response to thyroid stimulating hormone, extraocular muscle, skeletal muscle, and thyroid gland, 790 (Abst.)

Mucopolysaccharide—Cont'd
urinary acid, excretion, serum hexosamine content and, in hereditary primary amyloidosis, 544
Mucopolysaccharides, aortic, functional activity, 839
Mucoraceae, strains, pathogenic to man, in vitro activity of amphotericin B on, 251
Mucosa, jejunal, morphologic alterations in: malabsorptive syndrome induced by neomycin, 245
Multiple myeloma, alpha$_2$-type, 44
sclerosis, electrophoretic partition of cerebrospinal fluid and serum proteins in, 382
Muscle, extraocular, skeletal muscle, and thyroid gland mucopolysaccharide response to thyroid stimulating hormone, 790 (Abst.)
Myeloma, multiple, alpha$_2$-type, 44
Myocardial metabolism, effect of inosine on, 794 (Abst.)
oxygen consumption, ventricular tension as determinant, 926 (Abst.)
uptake and efficiency: effects of heart rate, size, and tension, 941 (Abst.)
Myxedema, blepharoptosis in, 920 (Abst.)

N

Neomycin, malabsorptive syndrome induced by: morphologic alterations in jejunal mucosa, 245
Neomycin-bacitracin nasal ointment, influence, on staphylococcal transfer in hospital, 921 (Abst.)
Nephritis, foreign protein, example: renal lesions induced by heterologous insulin, 819 (Abst.)
Nephrocalcinosis, renal tubular acidosis and, excretion of citrate in patients with, 802 (Abst.)
Nephropathy in mice after exposure to Group A, type 12 streptococci, 265
Nephrotic syndrome, "refractory," osmotic diuretic treatment, 792 (Abst.)
Neural activity, sympathetic, hemodynamic studies in man before and after three chemical agents which block, 959 (Abst.)
Neutralization titers, bacteriophage, serum complement and, in human infections, leukemias, and lymphomas, 594
Newborn human infant, failure of passive transfer of delayed hypersensitivity in, 139
Ninhydrin, colorimetric, method for total alpha amino acids of urine, 321
Nitrofurantoin, inhibition of glutathione reductase by, 884
Nitrogen metabolism, effects of glucagon on plasma unesterified fatty acids and, 342
Nitrogen—Cont'd
and mineral metabolism in patients on corticosteroid therapy, effect of anabolic steroids on, 954 (Abst.)
N,N'-bis-(3-bromopropionyl) and N,N'-bis-(3-chlorpropionyl) piperazine, antitumor properties, 949 (Abst.)
Nonrheumatoid, rheumatoid and, disease sera, seropositive, immunologic and biologic similarities: gel diffusion studies, 303
Norepinephrine, dopamine and, increased blood pressure responses to, produced by monoamine oxidase inhibitors in man, 747
effect of guanethidine on forearm responses to graded doses, 786 (Abst.)
Norethandrolone, changes in bile canaliculi produced by: electron microscopic study of human and rat liver, 623
Nosocomial urinary tract infections: analysis of factors influencing distribution and antimicrobial resistance of uropathogens, 281 (Abst.)
Nucleic acid synthesis in human bone marrow and leukemic cells, patterns of inhibition by chloramphenicol, 831
acids, influx, into marrow cells and its effect on hemoglobin electrophoresis, 957 (Abst.)
Nutritional status, influence; significance of vascular injurious factors in human plasma as determined by animal assay, 355

O

Obesity, extreme, cardiopulmonary effects, further studies, 787 (Abst.)
OCT (ornithine carbamyl transferase) activity in human tissue homogenates, 218
Oil, corn, bile acid excretion in man after ingestion, 809 (Abst.)
Ointment, nasal, neomycin-bacitracin, influence, on staphylococcal transfer in hospital, 921 (Abst.)
Oleandomycin, vancomycin, or dihydrostreptomycin, erythromycin in combination with, rate of development of resistance in Staphylococcus aureus to, 83
Opsonification of bentonite particles by gamma globulin, 952 (Abst.)
Ornithine carbamyl transferase activity in human tissue homogenates, 218
Osmotic diuretic treatment of "refractory" nephrotic syndrome, 792 (Abst.)
fragility of human blood platelets, 120
Osteoporosis, human disuse, radiocalcium metabolism in, 825 (Abst.)

Oxygen consumption, myocardial, ventricular tension as determinant, 926 (Abst.)
uptake and efficiency, myocardial: effects of heart rate, size, and tension, 941 (Abst.)

P

Pancreas, cystic fibrosis of nature of lipid disturbance in, 828 (Abst.)
Pancreatic, hepatobiliary and, disease, serum leucine aminopeptidase activity in, 417
secretion, alteration, by anticholinergic drugs, 798 (Abst.)
Paper disks, bacteriophage on: Staphylococcus aureus, 777
Partition, electrophoretic, of cerebrospinal fluid and serum proteins in multiple sclerosis, 382
Passive transfer of delayed hypersensitivity, failure, in newborn human infant, 139
Penicillamine, serum protein changes in Waldenström's macroglobulinemia during administration, 212
Penicillin, erythromycin, tetracycline, and chloramphenicol in human serum, comparison of bacteriostatic and bactericidal activity, 820 (Abst.)
-resistant staphylococci isolated from rheumatic children on penicillin, higher incidence, than from control children, 824 (Abst.)
Pericardial effusion, massive, differentiation, from cardiac dilatation using I^{131}-labeled albumin, 933 (Abst.)
pH, blood, effect of alterations, on distribution of ammonia from blood to cerebrospinal fluid in patients in hepatic coma, 687
Phenomenon, sickle cell, in vivo study, 854
Pheochromocytoma, catecholamines in patients with, 506
Phosphatase test, acid, for evaluation of androgen activity, rapid, 918 (Abst.)
Phosphate, calcium, and citrate excretion patterns of normal and hypoparathyroid subjects after calcium administration, 944 (Abst.)
ester hydrolysis, disaccharide and, cellular nature, 928 (Abst.)
Phosphorus, serum inorganic, decrease, after long-term administration of chlorpropamide in diabetic patients, 944 (Abst.)
Physiologic type, retinopathy and, in diabetes mellitus, relationship, 811 (Abst.)
Pigment, serum bile, fractions during course of jaundice, 925 (Abst.)
Pinworms (*See* Enterobiasis)
Piperazine, N,N'-bis-(3-bromopropionyl) and N,N'-bis-(3-chlorpropionyl), antitumor properties, 949 (Abst.)
Placenta and human kidney, similar or identical connective tissue antigens in, 948 (Abst.)
Plasma, determination of constrictor substance in, by means of strip of rabbit aorta as aid in differential diagnosis of renal vascular occlusive disease, 828 (Abst.)
free corticosteroids, clinical comparison of two methods for determining: fluorometry versus colorimetry, 946 (Abst.)
further modification of benzidine method for measurement of hemoglobin in, 486
human, significance of vascular injurious factors in, as determined by animal assay; influence of nutritional status, 355
potassium, prevention of Stokes-Adams seizures by reducing, with chlorothiazide, 950 (Abst.)
rate of disappearance from, of uric acid administered intravenously to Dalmatian dogs, 805 (Abst.)
unesterified fatty acids and nitrogen metabolism, effects of glucagon on, 342
volume expansion and reactions after infusion of autologous and nonautologous plasma in man, 734
Plasmas, anemic and polycythemic, hemopoietic activity, 923 (Abst.)
Plasmin, effect, in vitro on clotting factors in plasma, 644
Platelets, human blood, osmotic fragility, 120
phase and electron microscopy osmotic fragility and thromboplastin generation studies, in patients with thrombocytopenia, 816 (Abst.)
Pneumonia, human primary atypical, fluorescent stainable antibodies to Eaton agent in; transmission studies, 799 (Abst.)
Pneumonitis, viral, in University of Wisconsin students, 809 (Abst.)
Poliomyelitis, nonparalytic, aseptic meningitis, or? 943 (Abst.)
Polycythemic plasmas, anemic and hemopoietic activity, 923 (Abst.)
Polymerization, defective fibrin; its pathogenesis and clinical significance, 813 (Abst.)
Polyvalent influenza, adjuvant—adenovirus vaccine, 927 (Abst.)
Population, civilian, study of adenovirus infection in, by use of complement fixation reaction, 796 (Abst.)
Potassium, plasma, prevention of Stokes-Adams seizures by reducing, with chlorothiazide, 950 (Abst.)
salts, effect of oral, on functional and organic T waves, 956 (Abst.)
sodium and, renal distribution: relationship to concentrating ability of kidney in potassium depleted and

Potassium—Cont'd
vitamin D intoxicated rats, 807 (Abst.)
Povan (*See* Pyrvinium pamoate)
Prednisone, effect, on blood coagulation time in patients on Dicumarol therapy, 14
high and massive doses, comparison of metabolic effects, 63
Pregnancy, progesterone-aldosterone interrelationships in, 806 (Abst.)
Properdin system of dog, effect of hemorrhagic shock upon, 105
Protein changes, serum, in Waldenström's macroglobulinemia during administration of low molecular weight thiol (penicillamine), 212
extracts of trophoblastic tumors in man, gonadotropic hormone distribution in, 258
foreign, nephritis, example: renal lesions induced by heterologous insulin, 819 (Abst.)
serum, binding, influence, on renal clearance of I^{131}-labeled Diodrast, 463
from one hundred and five healthy adults, infrared analysis, 391
Proteins, serum, cerebrospinal fluid and, electrophoretic partition, in multiple sclerosis, 382
lipids, and atherosclerosis in cholesterol-fed rabbits, effect of active immunization with polyvalent human beta lipoprotein antigens on, 788 (Abst.)
Prothrombin activity, micromethod for determination, 659
Pruritus, relief, in jaundiced patients fed bile acid sequestering resin, lowering of serum bile acid concentrations and, 797 (Abst.)
Pulmonary lesions, cutaneous and, in Coxsackie A-9 infections, 921 (Abst.)
systemic, and coronary hemodynamics and metabolism of intact dog, effect of endotoxin (Serratia marcescens), 38
tissue volume and pulmonary capillary blood flow, measurement by rebreathing method, 922 (Abst.)
venoarterial admixture in cirrhosis of liver: possible site of pulmonary shunting, 790 (Abst.)
Purpura, thrombocytopenic, fluorescence microscopy in study of megakaryocytes in, 935 (Abst.)
Pyelonephritis, unilateral experimental, bicarbonate reabsorption in dog with, 931 (Abst.)
Pyrvinium pamoate, dithiazinine iodide and, in treatment of enterobiasis (pinworms), comparison, 413

R

Radioactive silver, metabolism, in patient with carcinoid, 499
Radioactivity, distribution, in man after oral ingestion of small test doses of radiolabeled cyanocobalamin, 547
Radiocalcium metabolism in human disuse osteoporosis, 825 (Abst.)
Radioiodinated Hippuran, use, for individual kidney function tests, 438
Radioiodine-labeled triolein, effect of alterations in accompanying meal on rate of absorption, 950 (Abst.)
Radiopotassium, reactor produced, radiosodium contamination of standard preparation: nature, amount, and significance in biologic work, 127
Radiosensitive tissue, biochemical effects of direct and distant x-irradiation on, 919 (Abst.)
Radiosodium contamination of standard preparation of reactor produced radiopotassium: nature, amount, and significance in biologic work, 127
Radiothyroxine utilization in children, 933 (Abst.)
Rate of cerebral blood flow in humans, rapid and simple method for measuring, with $krypton^{85}$, 473
phenomena attempts to alter; differential analysis of hepatic excretory function with gamma emitting isotopes, 193
Ratio of coproporphyrin isomers I and III, infrared method for determination, 652
Reabsorption, bicarbonate, mechanism in man, 294
Reaction, complement fixation, study of adenovirus infection in civilian population by use, 796 (Abst.)
Reactor produced radiopotassium, radiosodium contamination of standard preparation: nature, amount, and significance in biologic work, 127
Rebreathing method, measurement of pulmonary tissue volume and capillary blood flow by, 922 (Abst.)
Red blood cell (*See* Erythrocyte)
Renal clearance of I^{131}-labeled Diodrast, influence of serum protein binding on, 463
distribution of sodium and potassium: relationship to concentrating ability of kidney in potassium depleted and vitamin D intoxicated rats, 807 (Abst.)
excretion of electrolytes, effect of L-arginine on, 822 (Abst.)
of water and solute in man, effect of meperidine and secobarbital upon, 727
failure, isotope studies on development, during treatment of ascites associated with cirrhosis, 798 (Abst.)

Renal—Cont'd
function in magnesium deficient rats, 947 (Abst.)
hemodynamics; effects of dry heat on circulation of man, 951 (Abst.)
lesions induced by heterologous insulin: example of foreign protein nephritis, 819 (Abst.)
medulla, extract from, antihypertensive property in renoprival hypertension, 167
further evidence in support of antihypertensive principle from, 932 (Abst.)
transplantation, human: functional status of denervated kidney after successful homotransplantation in identical twins, 1
tubular acidosis and nephrocalcinosis, excretion of citrate in patients with, 802 (Abst.)
vascular occlusive disease, determination of constrictor substance in plasma by means of strip of rabbit aorta as aid in differential diagnosis, 828 (Abst.)
Reovirus, electron microscopic examination of cells infected with, 824 (Abst.)
Reserpine administration, stroke volume and ventricular dynamics in hyperthyroidism and modification by, 803 (Abst.)
Resin, bile acid sequestering, relief of pruritus in jaundiced patients fed, lowering of serum bile acid concentrations and, 797 (Abst.)
Resistance, development, in Staphylococcus aureous to erythromycin in combination with oleandomycin, vancomycin, or dihydrostreptomycin, 83
Retinopathy and physiologic type in diabetes mellitus, relationship, 811 (Abst.)
$Rh_o(D)$ genotype, failure, to influence quantity of erythrocyte $Rh_o(D)$ antigen, 789 (Abst.)
Rheumatic children on penicillin prophylaxis, higher incidence of penicillin-resistant staphylococci isolated from, 824 (Abst.)
Rheumatoid factor, evaluation of test for, 821 (Abst.)
and nonrheumatoid disease sera, seropositive, immunologic and biologic similarities: gel diffusion studies, 303
Rose bengal, I^{131}-labeled, estimation of hepatic blood flow in man and in dogs by, 537

S

Sclerosis, multiple, electrophoretic partition of cerebrospinal fluid and serum proteins in, 382
Secobarbital, meperidine and, effect, upon renal excretion of water and solute in man, 727
Secretion and metabolism of cortisol after injection of endotoxin, 50
pancreatic, alteration, by anticholinergic drugs, 798 (Abst.)
Sectioning, spinal cord method for maintaining orientation, in, 894
Sensitivity studies, growth enhancement found during: clinical implications: cycloserine, 607
Separation, leukocyte, simple method, 310
Sera, seropositive rheumatoid and nonrheumatoid, immunologic and biologic similarities: gel diffusion studies, 303
Serotonin concentration, simultaneous arteriovenous, cardiac catheterization findings including, in malignant carcinoid syndrome, 787 (Abst.)
Serratia marcescens (endotoxin), effect, upon systemic, pulmonary, and coronary hemodynamics and metabolism of intact dog, 38
Serum bile acid concentration, lowering, and relief of pruritus in jaundiced patients fed bile acid sequestering resin, 797 (Abst.)
pigment fractions during course of jaundice, 925 (Abst.)
blood, cerebrospinal fluid and, comparison of effect, on tissue culture, 431
calcium analysis, routine, clinical value, 794 (Abst.)
cholesterol: relation of degree of esterification to lipoprotein density and to lipoprotein concentration as influenced by gonadal steroids, 817 (Abst.)
complement in amyloidosis, 629
and bacteriophage neutralization titers in human infections, leukemias, and lymphomas, 594
electrolytes, body fluids, and exchangeable sodium in hypertensive patients, effects of long-term treatment with chlorothiazide, 401
hexosamine content and urinary acid mucopolysaccharide excretion in hereditary primary amyloidosis, 544
human, comparison of bacteriostatic and bactericidal activity of penicillin, erythromycin, tetracycline and chloramphenicol in, 820 (Abst.)
inorganic phosphorus, decrease, in diabetic patients after long-term administration of chlorpropamide, 944 (Abst.)
leucine aminopeptidase activity in hepatobiliary and pancreatic disease, 417
lipids and lipoproteins, effects of corticosteroids, in adrenocortical hyperfunction, 665

Serum lipids—Cont'd
proteins, and atherosclerosis in cholesterol-fed rabbits, effect of active immunization with polyvalent human beta lipoprotein antigens, 788 (Abst.)
lipoproteins, role of human, in lipid transport: studies with intravenous fat, 918 (Abst.)
and other body fluids, measurement of lecithinase A in, 959 (Abst.)
of patients with systemic lupus erythematosus and their relatives, antinuclear factors in, 936 (Abst.)
protein binding, influence, on renal clearance of I^{131}-labeled Diodrast, 463
changes in Waldenström's macroglobulinemia during administration of low molecular weight thiol (penicillamine), 212
infrared analysis, from one hundred and five healthy adults, 391
proteins, cerebrospinal fluid and, electrophoretic partition, in multiple sclerosis, 382
and spinal fluid calcium, changes, effected by disodium ethylenediaminetetraacetate, 947 (Abst.)
sulfation factor, actions of insulin and, importance of amino acids in, to stimulate sulfate uptake by cartilage from hypophysectomized rats, 673
Sexuality, correlation, with susceptibility and exposure to environmental substances, 939 (Abst.)
Shock, endotoxin, in primate, 818 (Abst.)
hemorrhagic, effect, upon properdin system of dog, 105
Shunt, aortopulmonary, measurement by double indicator dilution curves, 207
Shunting, pulmonary, possible site: pulmonary venoarterial admixture in cirrhosis of liver, 790 (Abst.)
Sickle cell phenomenon, in vivo study, 854
Silver, radioactive, metabolism, in patient with carcinoid, 499
Skeletal muscle, extraocular muscle, and thyroid gland mucopolysaccharide response to thyroid stimulating hormone, 790 (Abst.)
Sleep, blood coagulation during, 25
Smoke, cigarette, effect, in vivo, on surface tension of extracts of rat lungs, 929 (Abst.)
Sodium, exchangeable, body fluids, serum electrolytes and, effects of long-term treatment with chlorothiazide, in hypertensive patients, 401
lactate, systemic and coronary hemodynamic effects, 874
Sodium—Cont'd
and potassium, renal distribution: relationship to concentrating ability of kidney in potassium depleted and vitamin D intoxicated rats, 807 (Abst.)
Solute, water and, renal excretion, in man, effect of meperidine and secobarbital upon, 727
Space occupying lesions of liver, detection, by directional counting of Co^{60}-labeled B_{12}, 290
Spinal cord sectioning, method for maintaining orientation, 894
fluid, serum and, calcium, changes, effected by disodium ethylenediaminetetraacetate, 947 (Abst.)
Sponge biopsy, subcutaneous, connective tissue, influence of site of implantation on lipid content, 760
Staphylococcal infections, experimental gamma globulin in, 701
transfer in hospital, influence of neomycin-bacitracin nasal ointment on, 921 (Abst.)
Staphylococci, coagulase-positive, isolation and identification, on Levine's eosin-methylene blue agar, 908
penicillin-resistant, isolated from rheumatic children on penicillin prophylaxis, higher incidence, 824 (Abst.)
Staphylococcus aureus: bacteriophage on paper disks, 777
development of resistance in, to erythromycin, in combination with oleandomycin, vancomycin, or dihydrostreptomycin, 83
Stereotaxic lesion in hypothalamus of beagle, metabolic responses after, 803 (Abst.)
Steroid, adrenal, hormone production, reduction, by inhibitor of cholesterol biosynthesis, 927 (Abst.)
Steroids, anabolic, effect, on nitrogen and mineral metabolism in patients on corticosteroid therapy, 954 (Abst.)
gonadal, relation of degree of esterification to lipoprotein density and concentration as influenced by, 817 (Abst.)
Sterols in blood of patients treated with MER/29, 793 (Abst.)
Stokes-Adams seizures, prevention, by reducing plasma potassium with chlorothiazide, 950 (Abst.)
Strains of mucoraceae pathogenic to man, in vitro activity of amphotericin B on, 251
Streptococcal enzymes, effect, upon contractility of human and guinea pig atria, 955 (Abst.)
Streptococci, Group A, type 12, nephropathy in mice after exposure to, 265

Stress, hyperglycemic, prolonged and continuous, exhaustion of insulogenic reserve in adult onset diabetics during, 945 (Abst.)
Stroke volume and ventricular dynamics in hyperthyroidism and modification by reserpine administration, 803 (Abst.)
Sugars, erythrocytes modified with, frozen, and stored in frozen state, post-transfusion survival; preservation of blood for transfusion, 587
in vitro recovery after freezing and thawing; preservation of blood for transfusion, 576
Sulfate, increased uptake, by cartilage in vitro after treatment of alloxan-diabetic hypophysectomized rats with growth hormone, 682
uptake by cartilage from hypophysectomized rats, importance of amino acids in actions of insulin and serum sulfation factor to stimulate, 673
Sulkowitch test and quantitative urinary calcium excretion, 314
Sympathetic neural activity, hemodynamic studies in man before and after three chemical agents which block, 959 (Abst.)
Syndrome, Felty's antibody deficiency with hypergammaglobulinemia in, 940 (Abst.)
malabsorptive, induced by neomycin: morphologic alterations in jejunal mucosa, 245
malignant carcinoid, cardiac catheterization findings including simultaneous arteriovenous serotonin concentration in, 787 (Abst.)
"refractory" nephrotic, osmotic diuretic treatment, 792 (Abst.)
Systemic and coronary circulations, hemodynamic effects of β methyl 2,6-dimethylphenylether (SKF 6890) on, 409
hemodynamic effects of sodium lactate, 874
pulmonary, and coronary hemodynamics and metabolism of intact dog, effect of endotoxin (Serratia marcescens), 38

T

T waves, effect of oral potassium salts on functional and organic, 956 (Abst.)
Tension, surface, of rat lungs, effect of in vivo cigarette smoke on, 929 (Abst.)
ventricular, as determinant of myocardial oxygen consumption, 926 (Abst.)
Tests for rheumatoid factor, evaluation, 821 (Abst.)
Tetracycline, penicillin, erythromycin, and chloramphenicol in human serum, comparison of bacteriostatic and bactericidal activity, 820 (Abst.)
Tetranitrate, erythrol, systemic and coronary hemodynamic effects, 943 (Abst.)
Thalassemia trait, erythrokinetic studies, 866
Therapy, long-term corticoid, adrenocortical function after, 235
Thiol, low molecular weight (penicillamine), serum protein changes in Waldenström's macroglobulinemia during administration, 212
Thrombin generation; sensitive test for physiologic variations in coagulability of human blood, 955 (Abst.)
Thrombocytopenia after intravenous injection of India ink, 711
chronic acquired, 938 (Abst.)
phase and electron microscopy osmotic fragility and thromboplastin generation studies of platelets in patients with, 816 (Abst.)
Thrombocytopenic purpura, fluorescence microscopy in study of megakaryocytes in, 935 (Abst.)
Thymidine, tritiated, in vivo utilization, as study of bone marrow activity, 816 (Abst.)
Thyroid function in man, effect of vasopressin on, 934 (Abst.)
L-Thyroxine monodeiodination, inhibition, by thyroxine analogues, 919 (Abst.)
Thyroxine and triiodothyronine, uptake, by rat diaphragms, in vitro, 804 (Abst.)
Tissue, adipose, effect of glucose upon release of fatty acids by, 930 (Abst.)
and liver glycogen in rats limited to short daily feeding period, 827 (Abst.)
antigens, similar or identical in human placenta and human kidney, 948 (Abst.)
cultures, comparison of effect of cerebrospinal fluid and blood serum on, 431
homogenates, erythropoietic effect, 938 (Abst.)
human, ornithine carbamyl transferase in, 218
maternal, induction by hyaluronidase of tolerance to, in rabbits, 928 (Abst.)
reactions, homologous, following microtransfusions of blood, 930 (Abst.)
subcutaneous sponge biopsy connective, influence of site of implantation on lipid content, 760
volume and capillary blood flow, pulmonary, measurement by rebreathing method, 922 (Abst.)

Tissues, radiosensitive, biochemical effects of direct and distant x-irradiation on, 919 (Abst.)
Titers, bacteriophage neutralization, serum complement and, in human infections, leukemias, and lymphomas, 594
Toxin-antitoxin phenomena in burned and injured human subjects, 942 (Abst.)
Toxoplasma infection in uterus, chronic, 879
Transfer, passive, of delayed hypersensitivity, failure, in newborn human infant, 139
Transferrin, lowering, during iron absorption in iron deficiency, 555
Transfusion, preservation of blood for; in vitro recovery after freezing and thawing of red cells modified with sugars, 576
posttransfusion survival of red cells modified with sugars, frozen, and stored in frozen state, 587
Transport, lipid, role of human serum lipoproteins in: studies with intravenous fat, 918 (Abst.)
Trauma, mechanisms by which carbohydrate metabolism is altered with, 805 (Abst.)
Triiodothyronine, thyroxine and uptake, by rat diaphragms in vitro, 804 (Abst.)
Triolein, radioiodine-labeled, effect of alterations in accompanying meal on rate of absorption, 950 (Abst.)
Tritiated thymidine, in vivo utilization, as study of bone marrow activity, 816 (Abst.)
Tritium oxide, determination of total body water with, 952 (Abst.)
Trophoblastic tumors, protein extracts, in man, gonadotropic hormone distribution in, 258
Tumoral, human leukemic and, cells, segregation of antigens from, by fluorocarbon extraction; detection by gel diffusion, 333
Tumors, trophoblastic, in man, gonadotropic hormone distribution in protein extracts, 258
Twins, identical, functional status of denervated kidney after successful homotransplantation in, 1
Type, physiologic, retinopathy and, in diabetes mellitus, relationship, 811 (Abst.)

U

Unesterified fatty acids, plasma, and nitrogen metabolism, effects of glucagon on, 342
University of Wisconsin students, viral pneumonitis in, 809 (Abst.)
Uric acid, administered intravenously to Dalmatian dogs, rate of disappearance from plasma, 805 (Abst.)
Uridine, cytidine and, metabolic defect in hepatic cirrhosis which is reversed by, 807 (Abst.)
Urinary acid mucopolysaccharide excretion, serum hexosamine content and, in hereditary primary amyloidosis, 544
calcium excretion, Sulkowitch test and, 314
excretion of chlorpromazine in man, 570
tract infections, nosocomial; analysis of factors influencing distribution and antimicrobial resistance of uropathogens, 821 (Abst.)
Urine, culture, 899
isolation from, of potent adipokinetic substance: lipoatrophic diabetes, 924 (Abst.)
total alpha amino acids, colorimetric ninhydrin method for, 321
Uterus, chronic Toxoplasma infection in, 879

V

Vaccine, adenovirus: adjuvant polyvalent influenza, 927 (Abst.)
Vancomycin, oleandomycin, or dihydrostreptomycin, erythromycin in combination with, rate of development of resistance in Staphylococcus aureus to, 83
Vascular alterations induced by endotoxin, studies on trigger mechanism involved in, 953 (Abst.)
injurious factors in human plasma as determined by animal assay, significance; influence of nutritional status, 355
occlusive disease, renal, determination of constrictor substance in plasma by means of strip of rabbit aorta as aid in differential diagnosis, 828 (Abst.)
resistance, peripheral, cations, water, and, 934 (Abst.)
responses, forearm, to graded doses of norepinephrine, effect of guanethidine, 786 (Abst.)
Vasopressin, effect, on thyroid function in man, 934 (Abst.)
Venoarterial admixture, pulmonary, in cirrhosis of liver: possible site of pulmonary shunting, 790 (Abst.)
Venous tone, peripheral, effects of hypoxia, in man, 847
Ventricular, atrial and, contraction, effect of variation in time delay between, on cardiac output in dogs with chronic A-V dissociation using electronic bypass for A-V bundle, 791 (Abst.)
dynamics, stroke volume and, in hyperthyroidism and modification by reserpine administration, 803 (Abst.)
tension as determinant of myocardial oxygen consumption, 926 (Abst.)

Vitamin D intoxicated rats, potassium depleted and, concentrating ability of kidney in: renal distribution of sodium and potassium, 807 (Abst.)

W

Waldenström's macroglobulinemia, serum protein changes, during administration of low molecular weight thiol (penicillamine), 212

Water, cations, and peripheral vascular resistance, 934 (Abst.)

load, large, effect in dogs, upon volume and composition of extracellular fluid, 830 (Abst.)

Water—Cont'd

and solute, renal excretion, in man, effect of meperidine and secobarbital upon, 727

total body, determination, with tritium oxide, 952 (Abst.)

White blood cells (*See* Leukocyte)

Wisconsin, University of, viral pneumonitis in students, 809 (Abst.)

X

X-irradiation, biochemical effects of direct and distant, in radiosensitive tissues, 919 (Abst.)
